

Parasport's in the Fundy Region

Para or Adaptive sports are competitive and/or recreational sports that are accessible to everyone, and can be played by anyone whether living with or without a disability!

Parasports can be offered in many different forms. Some are offered as a stand-alone program (all people have similar disabilities) such as Goalball, and some are integrated programs (a mix of players, with a disability, and abled bodied players).

Did you know there are tons of Parasport programs available across the Fundy Region? See the list of all the programs available in the Fundy Region on the reverse or by following the QR code to the right!
